Beschrijving

Bali 4.6 Open Space

Superb 2024 Bali 4.6 Open Space in 4-cabin – 3-bathroom owner's version available in the Caribbean.

This vessel is presented by Vincent Vallée, professional yacht broker based in Martinique since 2022, your preferred contact for ELISSA Yachting in the Caribbean. Photos, videos and 3D tour were taken onboard in February 2026.

First owner, this catamaran is fully equipped and optimized for liveaboard cruising and extended voyages. It is immediately available in the Caribbean with delivery options according to your schedule.

The Bali 4.6 Open Space is today one of the most sought-after cruising catamarans in its category for its exceptional volume and unique liveaboard concept. This unit stands out for a particularly comprehensive equipment level, enabling comfortable use both underway and at anchor, in the Caribbean as well as for extended cruising ventures.

Propulsion has been optimized with two 57 hp Yanmar engines. Autonomy is a major strength of the vessel with approximately 2500 W solar capacity, a 7.5 kW generator and a 105 L/h watermaker, offering significant energy and water independence.

After sailing in the Mediterranean followed by an Atlantic crossing, this vessel is today fully reliable with numerous options and upgrades. The owners have been living aboard full-time since August 2024 and have ensured continuous and rigorous maintenance, allowing immediate handover without the usual constraints of a new vessel.

The 4-cabin – 3-bathroom version offers an excellent balance between owner comfort and guest accommodation capacity. The Open Space concept, Bali's signature, creates a true living space without separation between the saloon and cockpit, with fluid circulation to the forward deck and flybridge.

This catamaran in near-new condition represents a rare market opportunity, ready to sail immediately, whether for a private program or rental investment with strong potential in the Caribbean.

The vessel can also be offered with various water sports equipment options, notably including a FliteBoard (electric eFoil), bicycles, an inflatable paddle board and an aqua bike.

A very comprehensive file is available including over 300 photos, a 3D tour accessible online on our website as well as a detailed video of the complete tour upon request.
