Beschrijving

SKYFALL is a Contest 55 CS built by Conyplex, embodying the renowned Dutch shipyard’s expertise in high-quality offshore cruising yachts. Designed by Doug Peterson, she offers a perfect balance between safety, comfort and long-distance sailing capability.

With a length of 16.75 metres and a composite sandwich construction, SKYFALL features a solid hull, elegant lines and a protected cockpit designed for safe offshore navigation. Her deck layout allows efficient sail handling and is well suited for short-handed sailing.

Inside, the yacht offers a warm and refined atmosphere with high-quality wood finishes. The saloon is spacious and bright, with a comfortable dining area and generous seating. The galley is fully equipped for offshore use, providing practicality and safety underway.

SKYFALL accommodates 6 guests in 3 cabins, including a forward owner’s cabin and two guest cabins. The layout ensures comfort and privacy for extended cruising.

Equipped with a furling rig, hydraulic systems and a complete sail wardrobe including an asymmetrical spinnaker, she offers both ease of handling and sailing performance. Her technical equipment includes modern navigation systems, air conditioning, watermaker, solar panels and a hydro generator.

Maintained to a high standard and extensively refitted in 2025, SKYFALL is ready for immediate cruising and represents an excellent opportunity for bluewater sailors seeking reliability and comfort.
