Beschrijving

The Lagoon 400 is a 12-meter cruising catamaran designed to meet the needs of sailors seeking space, comfort, and ease of handling. It offers exceptional interior volume for its size, with a bright saloon, a functional galley, and spacious cabins. Its layout provides a feeling of spaciousness comparable to that of much larger monohulls. The raised helm station and grouped controls facilitate maneuvers both at sea and in port, even with a small crew. This model has undergone a complete refit (invoices available). A berth is available. Daily viewings are possible by appointment. Please do not hesitate to contact us for further information.
