DISCLAIMER

All information regarding the boat, its equipment and technical specifications is provided to the best of our knowledge and belief, based on the information available to us and details supplied by the owner. The information does not constitute a guarantee or warranty of specific characteristics.

In particular, all weight figures are approximate and may vary depending on the individual equipment and the additional laminated-in ballast of this offshore version.

Beschrijving

MARINER 20 – COMPACT CRUISER WITH PLENTY OF SPACE

The Mariner 20 is a compact and versatile sailing cruiser that combines easy handling with a surprisingly generous amount of space for a boat of this size. This makes her equally suitable for relaxed day sailing, weekend trips and shorter cruising holidays.

The well-designed cockpit provides plenty of room for the crew while allowing the boat to be handled easily, even with a small crew. Thanks to her compact dimensions, the Mariner 20 remains highly manageable and is easy to manoeuvre in smaller marinas and on inland waters.

Below deck, the Mariner 20 makes excellent use of the available space. The functional interior provides comfortable accommodation and useful storage, turning this compact sailing boat into a capable small cruiser suitable for longer stays on board.

Her versatile concept makes the Mariner 20 particularly attractive to beginners, couples and small families looking for an easy-to-handle sailing boat without sacrificing the comfort and practicality of a compact cruising yacht.
