Talen: Duits, Engels, Pools, Slowaaks

Details

Boot-ID	**s317040**
kooien	**8 (waarvan bemanningskooien: 3)**

Technische gegevens

Diepgang	**0,85 m**
Rompmateriaal	**GVK/kunststof**
Romp-type	**half planerende boot**
Verwarming	**verwarming met airconditioner**
Watertank	**800 ltr**
Brandstoftank	**5.000 ltr**

motor

Model	**Epropulsion I-150**
Motorvermogen	**203,9 PK (150 kW)**
Model	**Epropulsion I-150**
Motorvermogen	**203,9 PK (150 kW)**

Uitrusting

Navigatie	**AIS - Automatic Identification System, autopilot, echolood, GPS, GPS plotter, radar, VHF-radio, visvinder**
Technische uitrusting	**220V landstroom aansluiting, accu, airconditioning, bilgepomp automatic, fecaliëntank, generator, handleidingen, omvormer, onderwater diepte aanstreping, onderwaterbelichting, boegschroef, slingerruit, stopcontacten 220V, warm water systeem, zonne-energie**
Uitrusting dek	**douche op achterdek, fender, teak cockpit, teak dek, zonkussen, hydraulisch zwemplatform, zwemtrap**
Interieur	**2. koelkast, afzuigkap, barbecue, cockpitafel, koelbox, koelkast, keramische kookplaat, magnetron, oven, elektrisch toilet, vaatwasser, wasmachine**
Consumenten-electronica	**mp3-speler met bluetooth, tv, tv antenne / DVB-T**
Veiligheid	**alarmsysteem, blusapparaat, brandkast, reddingsring, reddingsvesten, reddingsvlot**
Persennings	**hardtop, zonnekap**
Divisie - hutten	**aparte bemanningskabine (2), eigenaarshut (1), gastenhut (3), salon, stuurpositie op flybridge, toiletcabine, zijdelingse instap**

Beschrijving

The Oceanwalker E60 Electric Hull 12 is a new, fully completed electric power catamaran available for immediate delivery. Measuring 18.29 metres in length and 8.38 metres in beam, with a draft of only 0.85 metres, she offers exceptional interior volume, excellent stability and access to shallow anchorages.

The hull is constructed from high-quality GRP with structural carbon-fibre reinforcement, combining strength, reduced weight and efficient performance. Premium materials, teak exterior decking and carefully executed joinery underline the yacht's high standard of construction and finish.

ELECTRIC PROPULSION AND RANGE

Propulsion is provided by two ePropulsion I-150 electric motors, each producing 150 kW. Energy is supplied by a 282.6 kWh LFP propulsion battery bank. Two 45 kW Kohler generators operate as range extenders, recharging the batteries while cruising and providing a combined range of up to 3,000 nautical miles, depending on speed, load and sea conditions.

The 5,000-litre fuel capacity is dedicated to the range-extender generators. Maximum speed is approximately 15 knots, with an economical cruising speed of approximately 8 knots.

At anchor, the yacht can operate its domestic systems for up to approximately 36 hours using battery power alone under normal operating conditions. A solar installation of more than 8 kW supports the energy system, extends silent operation and reduces generator running time. Premium Victron equipment manages the yacht's electrical and battery systems.

ACCOMMODATION

The E60 offers four spacious guest cabins for eight guests, each with a private en-suite bathroom. Two separate crew cabins accommodate up to three crew members. A separate day head is also located on the main deck.

PREMIUM EQUIPMENT

The extensive specification includes equipment supplied by internationally recognised manufacturers:

- Miele induction hob, oven, dishwasher and washer-dryer
- Siemens refrigeration and freezer system
- Dometic air-conditioning system
- Garmin navigation, radar and communication package
- Fusion audio system
- Victron energy and battery-management system
- Twin 45 kW Kohler range-extender generators
- Rainman watermakers
- Hydraulic bathing platform
- Teak exterior decking
- High-quality LFP battery systems
- Premium interior materials and carefully executed joinery

The electric propulsion system provides virtually silent manoeuvring and exceptionally quiet cruising. The combination of electric motors, substantial battery capacity, solar power and generator range extenders offers both low-emission operation and the range required for extended cruising.

PURCHASE, INSPECTION AND TRANSPORT

Elit Yachts provides comprehensive assistance throughout the purchase process. We can arrange a private inspection and technical presentation, coordinate documentation, acceptance and commissioning, and organise professional transport to the buyer's chosen destination worldwide.

Oceanwalker E60 Electric Hull 12 is fully completed and available for immediate delivery.

Asking price: EUR 3,700,000 excluding VAT.
Full specification and private inspection are available on request.
