Details

Boot-ID	**s251198**

Technische gegevens

Diepgang	**0,70 m**
Rompmateriaal	**GVK/kunststof**

motor

Model	**Evoy IB-Hurricane**
Motorvermogen	**400 PK (294 kW)**

Uitrusting

Navigatie	**GPS, kompas, plotter, VHF-radio**
Technische uitrusting	**220V landstroom aansluiting**
Consumenten-electronica	**cd, radio**

Beschrijving

We proudly present the Performance e801 a result of our successful partnership with Evoy, the renowned Norwegian manufacturer of electric boat motors.
The Performance e801 is a milestone in the development of electric boats. It combines performance, sustainability, and user-friendliness in an impressive way. The Evoy propulsion system, a powerful 400+ horsepower (300+ kW) liquid-cooled electric motor, forms the heart of this boat. Together with two waterproof 63.1 kWh Li-Ion batteries and a Evoy® HURRICANE stern drive, it enables the Performance e801 to reach top speeds of over 50 knots with outstanding handling.
The Performance e801 captivates not only with its technical performance but also with its classically sporty elegance, reflecting the Italian design tradition of the Performance model range. The result is an electric boat that is not only environmentally friendly but also visually stunning. The selection of premium materials, efficient space utilization, extensive customization options, and high technical quality showcase the signature of Performance in this model as well.
We are excited to offer a sustainable solution for the world of power boating with the powerful Evoy propulsion system. The emissions-free Performance e801 not only reduces emissions and ecological footprint but also opens up new possibilities for boat owners. With increasingly stringent regulations, owners of combustion engine boats face difficulties in obtaining permits for environmentally protected waters.
We are convinced that pioneering electric boats like the Performance e801 will shape the future of the private and commercial (sports-) boating sector, and offer this innovative solution to our customers worldwide.
