Beschrijving

Just arrived at Morgan Marine, this impressive 2017 Ring 850 RIB is powered by a 2023 Mercury Verado 400hp outboard with approximately 147 hours, delivering exceptional performance, reliability and exhilarating handling on the water. Renowned for its outstanding offshore capability, the Ring 850 combines a deep-V GRP hull with durable Hypalon tubes to provide a smooth, stable and confidence inspiring ride in a wide range of conditions. This well equipped example comes fitted with a stainless steel A-frame, full boat cover, console and jockey seat covers to help keep the boat protected when not in use. The helm features comfortable pilot and co-pilot bolster seating with backrests, while two additional twin jockey seats provide plenty of secure seating for family and friends. Navigation is taken care of by a Garmin 9 inch chart plotter and Garmin VHF radio, while the Fusion audio system with speakers provides the perfect soundtrack for days on the water. The boat presents well overall and would simply benefit from a clean to bring it back to its best. Whether you're looking for a capable offshore adventure boat, a fast family cruiser or a high performance RIB for water sports and coastal exploring, this Ring 850 offers an outstanding package with the added benefit of a modern, low hour Mercury Verado 400hp engine.
