Uitrusting dek	**fender**
Interieur	**barbecue, cockpitafel, oven, spoelbak**
Veiligheid	**reddingsvlot**
Persennings	**sprayhood / buiskap**

Beschrijving

“Ida" is a good example of the Sigma 362, a well-regarded performance cruiser designed by David Thomas and built by Marine Projects (Plymouth) in the UK. The 362 is known for its solid construction, seaworthiness, and excellent sailing performance, particularly upwind. With its wing keel, spade rudder, and a masthead sloop rig, which together contribute to responsive handling and good speed under sail. Below deck, the Sigma 362 offers a practical and comfortable layout, with forward and aft cabins, a spacious saloon, a functional galley, and a navigation station, making it suitable for both coastal cruising and longer offshore passages.

Its reputation for robust build quality and balanced sailing characteristics has earned it a loyal following among sailing enthusiasts. This example benefits from a new Volvo Penta D1-30 engine in 2022.
Berth at Weymouth Marina is available for the new owner to continue.

Available for viewings now, please call 01305 818541

MECHANICAL
Volvo Penta D1-30 27hp inboard diesel engine (New 2022)
